DATA SHEET

TENABLE.OT SPECIALIST CERTIFICATION EXAM

TENABLE.OT SPECIALIST CERTIFICATION

Tenable.ot™ provides visibility, security and control across Operational Technology (OT) and converged OT/IT environments. The Tenable.ot Specialist Certification is a two-part exam, written and practical, that validates your ability to plan, deploy, verify and troubleshoot Tenable's Operational Technology (OT) platform.

The exam is taken online in a proctored environment. The written exam must first be completed before you are allowed to take the practical portion. Upon successful completion of both exams, a Tenable.ot Specialist Certification will be provided in electronic format.

WRITTEN EXAM

Candidates are required to complete a sixty (60) question exam. The exam bank consists of both multiple-choice and true/false questions. We suggest candidates read the questions carefully before answering.

Two (2) hours are allocated for completion and a minimum score of 80% is required to pass.

PRACTICAL EXAM

Candidates are required to complete a set of activities simulating a real-world environment. The practical exam may include up to thirty (30) tasks to complete, and each is scored equally.

Four (4) hours are allocated for completion, and a minimum score of 80% is required to pass.

WHAT YOU WILL BE TESTED ON

1. Network Requirements
2. Appliance Deployment
3. Sensor Deployment
4. Passive Detection
5. Integration with Tenable.sc™
6. Active Queries
7. Events
8. Policies
9. System Settings
10. Troubleshooting
