CYBER EXPOSURE WORKSHOP FROM TENABLE PROFESSIONAL SERVICES

The Cyber Exposure Workshop assesses your existing vulnerability management program and defines a plan to optimize your Tenable solution, minimize your Cyber Exposure gap and reduce the cyber risk to your business.

With the Cyber Exposure Workshop from Tenable Professional Services, our industry experts ensure your vulnerability management program is operating at full strength. Through in depth interaction with our team we will help you develop a strategy and plan to reduce your cyber risk quickly. You will have increased visibility and overall assurance that your security controls are effective.

A Cyber Exposure Workshop is the ideal service for organizations in which one of the following statements holds true:

- You have selected Tenable as your solution-of-choice, but want to understand what the rollout looks like or minimize rollout risk.

- You have not yet deployed your Tenable solution and want expert advice on how to best deploy it for optimal results.

- You have already deployed your Tenable solution but want an outside, expert perspective on your overall vulnerability management program.

We will work with you to identify your program goals and gain an understanding of your Cyber Exposure. From there, we will call on our expertise and industry best practices to design a multi-phase roadmap that helps you achieve these goals on your timeline.

When the service concludes, you will have a custom-built roadmap and operating plan for your vulnerability management program, designed specifically to meet your security and business objectives.

Figure 1: The Cyber Exposure Workshop can be delivered remotely or on-site.

SERVICE OUTCOMES

- **Mature your VM program**
  Get a professionally developed Maturity Roadmap to guide your organization's Cyber Exposure journey

- **Close Cyber Exposure gaps quickly**
  Using a risk-based approach, we will identify gaps in your systems, tools and processes to develop a list of "Quick Wins" that are actionable

- **Align operations with best practices**
  Our consultants will verify that your business practices align with known best practices and document their guidance for peak VM program operations

KEY BENEFITS

Thorough Assessment of Current State

During a Cyber Exposure Planning Workshop, our consultant works with you to clarify the overall goals of your Risk-based Vulnerability Management (RBVM) program and understand what business processes are essential to achieving your security objectives.

Once we have a high-level understanding of your network topology and architecture, and any compliance requirements, we can provide you with the essential metrics necessary to inform technical and business decisions to drive risk reduction and mature your RBVM program.

Detailed Solution Review

Our consultants will help you gain deep knowledge and situational awareness into the operation and state of your attack surface while prioritizing the services and applications that need the most protection.

They will identify the gaps in your existing VM program and recommend where to include various Tenable solutions for ideal coverage and visibility, as well as recommending which Tenable solutions will best support your compliance requirements.

Identify Integration Opportunities

Tenable Professional Services will identify manual steps that could be automated, and recommend opportunities to integrate your infrastructure with Tenable solutions using either built-in or custom integrations.

Clear Solution Documentation

Tenable will provide documentation of our recommendations that will help you reduce your overall Cyber Exposure gap.

Supporting Your Growth

Organizations change and develop over time. Tenable Professional Services can help ensure your solution stays aligned to your evolving business requirements.

Experienced Professional Services Team

Tenable Professional Services' goal is to implement our products to solve your most pressing security problems, enabling your organization to see, predict and act on cyber risks. To accomplish this, we capitalize on our combined years of industry experience to tackle even the most challenging requirements.

By engaging Tenable Professional Services, you can realize the value of your Tenable investment more quickly to feel confident you are on the right path for RBVM program maturity. We have a broad portfolio of services and training available worldwide, remotely or on-site, to meet your specific needs.

About Tenable

Tenable® is the Cyber Exposure company. Approximately 40,000 organizations around the globe rely on Tenable to understand and reduce cyber risk. As the creator of Nessus®, Tenable extended its expertise in vulnerabilities to deliver the world's first platform to see and secure any digital asset on any computing platform. Tenable customers include approximately 60 percent of the Fortune 500, approximately 40 percent of the Global 2000, and large government agencies. Learn more at tenable.com.
